PROFILE

Adept Software Developer with a proven track record at Exilance Software, specializing in Flutter applications and API integration. Demonstrated success in developing impactful projects, enhancing user engagement through innovative UI/UX design, and fostering community participation. Skilled in full-stack development and Agile methodologies, ensuring project delivery within tight deadlines.

WORK EXPERIENCE

Exilance Software   2022- PRESENT
Software Developer

- Designed and developed scalable Flutter applications, focusing on seamless user experiences and robust functionality.
- Developed an NGO project enabling user enrollment as Informers or Donors, fostering social impact by: Allowing Informers to report locations of needy individuals. Enabling Donors to locate and assist nearby individuals in need by providing food. Implementing social media features, including photo uploads and posts, to engage users and promote community participation.
- Built a community-driven society app, enlisting businesses and families of specific communities to enhance networking and support.
- Engineered an accident detection system leveraging device sensors to: Detect accidents based on impact analysis. Automatically share user location with emergency contacts, nearby police stations, and hospitals. Trigger emergency calls to a designated contact for immediate assistance.
- Utilized modern Flutter techniques, RESTful APIs, and integration of location-based services to deliver high-performance applications.
- Collaborated with cross-functional teams to ensure timely delivery of projects while adhering to Agile methodologies.
- Demonstrated expertise in UI/UX design, location services, and real-time notification systems to enhance user engagement and application reliability.
- Updated old code bases to modern development standards, improving functionality.
- Developed software for desktop and mobile operating systems.
- Built databases and table structures for web applications.
- Coordinated deployments of new software, feature updates and fixes.
- Proved successful working within tight deadlines and a fast-paced environment.
- Corrected, modified and upgraded software to improve performance.
